

St. Croix River Map & Information Guide

River Section 2: Riverside Landing to Highway 70

This river map and guide provides information for the 46.5 mile section of the St. Croix River between Riverside Landing and Highway 70. Have a safe and enjoyable trip!

Personal Floatation
Devices (PFDs) are required
onboard for each passenger on all
vessels. Children under the age
of 13 must wear a properly
fitting PFD while in moving
vessels.

Avoid **overhanging trees** in the river. They can overturn a vessel and trap paddlers underwater.

Set ski use is prohibited on this stretch of river.

Open fires are permitted only in steel fire rings or grills. Dead and down wood may be collected for firewood except from islands. Possession of firewood that originates more than 50 miles away from the Riverway is prohibited. Fires must be out and ashes cold before you leave the area.

Camping is permitted in designated sites only. **There is a 3-night limit of stay.** Most campsites accommodate 3 tents. Group sites accommodate up to 6 tents.

** Primitive toilets are available at campsites and landings. At river areas without toilets, bury human waste 6 inches deep and at least 100 feet away from river and campsites.

It is illegal to collect or disturb freshwater mussels or their shells.

Deer ticks found along the river can carry Lyme disease. Check often for ticks and know the symptoms of the disease.

Construction on the Highway 35 bridge at Riverside Landing has begun. A short portage around the bridge may be required during some phases of construction. The area downstream of the bridge will be closed for use as a staging area. Facilities including campsites, restrooms and water will remain open on the upstream side of the bridge.

Drinking water is provided at some landings. See reverse for locations. River water must be treated to protect against giardia.

Carry out all trash. Bring trash bags with you.

Glass containers are prohibited on lands and waters within the Riverway.

Rapids in this stretch are usually classified as Class 1, the easiest type of rapids.
